<b>PART 1 –Eligibility Changes Made Since FY 2005</b> (Complete this section for EACH change)			
1. Name of eligibility change: FULL-FAMILY SANCTIONS			
2. Implementation date of eligibility change: 09/01/2006			
3. Description of policy, including the change from prior policy: Families in which the head of household refuses to engage in work participation activities are terminated after six months of noncompliance. During the six month period, the grant is reduced by the parent’s share or 40%, whichever is greater. Prior to this change, there was no six month limit on being in sanction. This policy was implemented effective 09/01/2006. The first month in which families were terminated was February 2007 (terminations were effective 02/28/2007).			
4. Description of the methodology used to calculate the estimated impact of this eligibility change (attach supporting materials to this form):  Each month, a list of cases terminated using the Sanction Reason Code 252 were reviewed to determine if the case had at least a one-month break in service after the case was closed. This identified any cases that were reinstated. The result was a list of cases that closed due to sanction and which were not reinstated the following month.			
5. Estimated average monthly impact of this eligibility change on caseload in comparison year: <u>-14</u>			

Count of AUs by ACES Paid Through Date (on record with 252 Status Reason Code) by Federal TANF Reporting 'Type of Family' where AU had at least a **one month** break in service after being sanctioned

### PART 2 – Estimate of Caseload Reduction Credit

(Complete Part 2 using Excel Workbook provided.)

#### Pro-Rata Reduction for Excess MOE – Summary

Taking into account the pro rata reduction in the FY2007 caseload due to excess MOE spending, the average monthly TANF two-parent caseload declined by 38.8 percent between FY 2005 and FY 2007.

<b>Washington TANF Two-Parent Caseload Data for FY 2005 and FY 2007</b>	
FY 2005 monthly average caseload	5,129
FY 2007 monthly average caseload (Average TANF caseload = 3,961 + average SSP caseload = 21)	3,982
FY 2007 monthly average caseload, adjusted for excess MOE spending	3,119
Actual Caseload decline, FY2005 to FY 2007	2,010
Adjusted Caseload decline, FY2005 to FY 2007 (Adjusted for full-family sanctions = 14 average monthly closures)	1,996
Sources: TANF Data Reports (Section Three – TANF & SSP Reports – Line 8)	

#### Pro-Rata Reduction for Excess MOE – Process Defined

1. The State has not received confirmation of its FFY 2007 work participation rate so the relevant spending floor is 80 percent of the basic MOE amount.
2. The pro rata reduction takes into account the use of federal TANF funds. The pro rata reduction is calculated as the State excess MOE assistance expenditures divided by the average assistance cost per case, where cost is the sum of State and federal TANF funds.
3. The end result is a pro rata reduction of 11,163 MOE-funded assistance cases based upon the all-family caseload.
4. A portion of the excess MOE-funded cases are then applied toward the two-parent family caseload based upon the ratio of the two-parent caseload to the all-family caseload (7.7%). This results in 863 cases attributed to the two-parent family caseload.
5. This number (863) is subtracted above from the actual FY 2007 monthly average caseload (3,982) to yield the adjusted FY2007 caseload of 3,119.
